Introduce

13/8/24

* Git & Github *

→ Scrum (15min) daily meeting / Team

4 sprint

Scrum master mediator blew/22 5 members

developers & client.

Scrum master

Team Leader

Team.

Scrum meet (7-14 days)

To do	progress	complete
Welcome	login	registra.
registra	Team	
login.	1. having	
	2. find	

github (mandatory)

open source platform (global media)

git (bash) website must be develop
in dynamic.

(local media).

git github

connection

SSH

Git
Github
Linux

pwd → print working directory.

mkdir, ls (directory vs folder)

drwxr
↓
directory read write execute

chmod
change mode

ls -la to view hidden files

drwxr-xr-x | -rwxr-xr-x | -rw-r--r- |
owner group others
(u) (g) (o)

14/8/24

rm → remove

to delete file rm welcome.html

do choose and delete use

`rm -r i`

`rm -rf` (force to remove)

`rm dir` (remove directly)

`drwx`

| | |

4 2 1

`chmod 753 filename.`

Copy

`cp source destination.`

`MV source destination.`

~~drwx~~

`drwx` | --- | ---

16/8/24

SSH key.

→ one github had multiple SSH.

→ check open ports are there or not in PC.

`git config --global user.name 'bunny'.`

`git config --global user.email '...'`

to create empty box (dir)

git init.

* if we take init then it created as

hidden file git status

git add.

* git commit -m " "

m means message

* git status:- It is used to check
whether the files are add or not.

git push -u origin master

init
